* The values of imports from oversea are recorded in British Currency, whilst all other values are recorded in Australian Currency.

EXPORTS—continued.

Of the total exports the United Kingdom purchased 5,423,668 lbs. valued at £580,779 and the United States of America 4,246,449 lbs. valued at £543,977.

Wheat.—Exports decreased from 23,589,598 bushels valued at £7,477,402 for 1944–45 to 13,510,257 bushels for £5,848,105 in 1945–46. An unusual feature in the last two years has been exports to the Eastern States which totalled 7,460,393 bushels for £2,768,848 in 1944–45, and 6,580,050 bushels for £2,440,536 in 1945–46.

The average export value per bushel was 8/7·887d. compared with 6/4·075d. for the previous year.

Flour (Wheaten).—Total exports were 2,338,839 centals (2,037,925 centals) for a value of £2,333,436 (£1,252,413). Ceylon, which took 1,069,585 centals valued at £1,114,801, was the biggest customer.

Timber.—The value increased from £570,028 to £722,790 and the number of super feet from 34,217,694 to 40,476,297. Sandalwood exports, which are not included in the above figures, were valued at £7,584.

Hides and *Skins.*—The total export value of Hides and Skins was £636,988 which represents an increase of £368,289 on 1944–45. The total includes Sheep and Lamb Skins, £455,129 ; Furred Skins, £153,876 ; and Cattle and Calf Hides, £25,638.

Frozen Beef.—Exports rose from 2,651,186 lbs. valued at £84,146 in 1944–45 to 9,508,999 lbs. for £278,635 in the year under review.

Frozen Pork.—Exports totalled 7,497,152 lbs. for a value of £272,570 compared with 3,740,724 lbs. for £127,203 in 1944–45.

Potatoes.—Exports totalled 260,201 cwts. for a value of £222,761. These figures represent decreases of 92,923 cwts. and £67,945 on the previous year.

Fresh Apples.—The figures indicate some revival of the export trade. Exports increased by 78,256 centals and £144,588 to 130,133 centals valued at £209,944.

Other increases and decreases of note were as follows :—

Increases.—Eggs in Shell, 303,280 dozen, £24,735 ; Tomatoes (Interstate only), 36,276 centals, £109,870 ; Confectionery, £19,822 ; Sheep, £44,686 ; Apparel, £88,345 ; Asbestos (Crude and Fibre), £33,971 : Bottled Ale and Beer, 192,099 gals., £84,331 ; Sheep, £44,686 : Antimony Ore, £39,082 ; Leather, £43,872 ; Essential Oils, £25,216.

PART IV.—INTERCHANGE.

1.—TRADE AND CUSTOMS FOR THE YEAR 1945-46.

It should be noted in the tables dealing with Trade, which follow, that Imports from Abroad are recorded in terms of British Currency, whilst all other values are expressed in terms of Australian Currency, except in Table No. 2, wherein all values have been estimated in terms of Australian currency. On page 207 Special Summary Tables (Nos. 9 and 10) show the Estimated Merchandise Balance of Trade after all values have been reduced to approximate terms of Australian Currency. In Table No. 9, allowance has been made for Gold in excess of current production shipped abroad, to arrive at the Total Nominal Balance of Trade.

LIST of STATISTICAL CLASSES and INDEX of ITEMS (For use with Tables 5 and 6)

STATISTICAL CLASSIFICATION OF IMPORTS AND EXPORTS ACCORDING TO STATISTICAL CLASSES.

Classes	Item Numbers.
Class 1.—Foodstuffs of Animal Origin, not including Live Animals	0001–0299
Class 2.—Foodstuffs of Vegetable Origin ; Non-Alcoholic Beverages, and Substances used in making	0300–0699
Class 3.—Spirituous and Alcoholic Liquors	0700–0799
Class 4.—Tobacco and Preparations thereof	0800–0899
Class 5.—Live Animals	0900–0999
Class 6.—Animal Substances (mainly unmanufactured), not Foodstuffs	1000–1299
Class 7.—Vegetable Substances and Fibres ; Cork and Manufactures ; Plastic Moulding Materials and Synthetic Fibres	1300–1999
Class 8(*a*).—Yarns and Manufactured Fibres	2000–2199
Class 8(*b*).—Textiles	2200–2599
Class 8(*c*).—Apparel	2600–2999
Class 9.– Oils, Fats and Waxes	3000–3299
Class 10.—Pigments, Paints and Varnishes	3300–3599
Class 11.—Rocks, Minerals (including ores and concentrates), and Hydrocarbons in solid or semi-solid form	3600–3999
Class 12(*a*).—Metals and Metal Manufactures (except Electrical Appliances and Machinery)	4000–5099
Class 12(*b*).—Dynamo Electrical Machinery and Electrical Appliances and Equipment not being Machinery	5100–5399
Class 12(*c*).—Machines and Machinery (except Dynamo Electrical)	5400–5999
Class 13(*a*).—Rubber and Rubber Manufactures (exept Apparel)	6000–6099
Class 13(*b*).—Leather and Leather Manufactures and Substitutes therefor (except Apparel)	6100–6299
Class 14.—Wood and Wicker, raw and manufactured	6300–6699
Class 15.—Earthenware, Cement, China, Glass and Stoneware	6700–6999
Class 16(*a*).—Pulp, Paper and Board	7000–7199
Class 16(*b*).—Paper Manufactures and Stationery	7200–7399
Class 17.—Sporting Material, Toys, Fancy Goods, Jewellery and Timepieces	7400–7599
Class 18.—Optical, Surgical and Scientific Instruments and Appliances and Photographic Goods, N.E.I.	7600–7999
Class 19.—Drugs, Fertilizers and Chemicals	8000–8999
Class 20.—Miscellaneous	9000–9599
Class 21.—Gold and Silver ; Bronze Specie	9600–9629

No. 5.—IMPORTS into the State, during the Year ended 30th June, 1946.

Note A.—On all Imports 10 per cent. has been added to the F.O.B. value of the goods at port of shipment. Imports from the Other States of the Commonwealth are recored in terms of Australian currency, while oversea imports are recorded in British currency values.

Note B.—The "Quantity" columns are left blank in all cases where the quantities delared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles imported.

Note C.—The following abbreviations are used throughout this table:—
N.E.I. means "Not elsewhere included."
N.E.S. means "Not elsewhere specified."

Note D.—The following record of Imports has been compiled according to a revised Statistical Classification, divided into 21 Classes, which came into operation on the 1st July, 1945. A list of the classes which comprised the Statistical Classification and an extensive Alphabetical Index of Imports and Exports are given on pages 15-36.

No. 6.—EXPORTS from the State during the Year ended 30th June, 1946.

Note A.—The value of goods exported is recorded in Australian currency. The basis of valuation is f.o.b., or its equivalent at port of shipment.

Note B.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size and consequently do not indicate the number, capacity or weight of articles imported.

Note C.—The following abbreviations are used throughout this table :—
N.E.I. means "Not elsewhere included."
N.E.S. means "Not elsewhere specified."

Note D.—The following record of Exports has been compiled according to a revised Statistical Classification divided into 21 classes which came into operation on the 1st July, 1945. A list of the classes which comprise the Statistical Classification and an extensive Alphabetical Index of Imports and Exports are given on pages 15–36.

No. 36.—Transactions of the Fremantle Harbour Trust and Bunbury Harbour Board during the undermentioned Periods.

NOTE.—The expenditure bases of the two Corporations are not the same. The Fremantle Harbour Trust employs all labour engaged in handling cargo on the wharves, whereas in the case of the Bunbury Harbour Board, general cargo is handled by the Railway Department for and on behalf of the Board, and bulk cargo by the Stevedores, and no revenue (other than wharfage) is derived therefrom or expenditure thereon incurred.

Special Notes—

1. The boundaries of Road Board Districts have been adopted as Statistical Districts since 1928–29 in lieu of the districts as defined in previous years from the Sheet Lines of the Standard Plans of the Lands Department.
2. Previous to 1942–3 returns were collected for certain *non-commercial* holdings carrying livestock, (*i.e.*, Racing Stables, etc.) or growing crops (*i.e.*, Kitchen Gardens, Fruit Trees, etc.) Particulars for such holdings are now excluded from published tables.

* The acreages under "Vineyards" and "Orchards" have been compiled on the basis of the actual number of Vines and Fruit Trees planted according to the standard suggested by the Department of Agriculture, viz., 450 vines or 100 fruit trees to the acre, to 1941–42. Since then areas were stated by growers. † Including "Small Fruits," and "Passion Vines."
(a) Including Meadow Hay, the figure for 1945–46 being 35,525 acres. (b) Two Row Varieties. (c) Six Row Varieties.

VI.—VALUE OF PRODUCTION.

NET VALUE—

The Annual Net Value of Production represents the sum available each year for distribution among those concerned in industry, i.e., workers, proprietors (including landlords), and providers of capital.

In combining industries this is the value that is used in order to avoid the inevitable duplication that would result if "Gross" or "Local" values were aggregated.

I. PRIMARY PRODUCTION.

(*a*) *Gross Value* is the value placed on recorded production at the wholesale price realised "at the principal market." In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are taken as the "principal market."

(*b*) *Marketing Costs*, which are deducted from "Gross Value" to obtain "Local Value," comprise Freight, Cost of Containers, Commission, and other handling charges.

(*c*) *Local Value* is the value recorded at the place of production, and is obtained by deducting "Marketing Costs" from "Gross Value."

(*d*) *The Value of Goods Consumed in the Process of Production* covers seed and fertilizers used, pickling, sprays, dips, fodder consumed, fuel and oil, certain depreciation, repairs, and similar costs, and is deducted from "Local Value" to obtain "Net Value."

(*e*) *Net Value* represents the return to the producer (farmer, pastoralist, mine owner, etc.) after deducting from "Local Value" the "Value of goods consumed in the process of production." Such return is the sum available for payment of wages, interest, rent, and producer's own income.

II. MANUFACTURING.

The initial value taken is that of Output "at factory door." The *Net Value of Manufacturing*, comparable with the net value of primary production, is the value added during the course of manufacture or treatment and is computed by deducting from output value the value of "goods consumed in process of production," viz.: materials used; power, fuel and light; repairs, lubricating oil and water; containers, packing, etc. In other words, it represents the sum available to the manufacturer for providing for wages, rent, interest, depreciation, certain unrecorded costs (such as advertising and insurance), and for his own income.

III. GENERAL.

(*a*) To secure a proper appreciation of the value of production as set out in the following tables it is well to keep in mind the following considerations:—The sum of the gross values of the several agents of production contains substantial duplications. The total value realised for a season's wheat, for instance, includes costs of transport, commission, and other handling charges, which items form the incomes of those performing these services. Similarly, the Local Value includes value of fertiliser, etc., used, which item will have been included in the value of manufactured production. Again, fodder grown and valued as an agricultural product would also, if fed to milch cows, be duplicated in the value of dairy production. When, however, *net* values are being ascertained, the value of such fodder consumed is deducted as a cost against dairying, thus eliminating duplication. Thus, while Gross Value represents a very accurate estimate of the value of the production of any particular industry, *only Net Values should be aggregated in arriving at a total value of "All Recorded Production."* The ratio of Marketing Costs to Gross Value of Production varies greatly as between industries. Thus, the great bulk of forestry production sustains no marketing costs, as the logs form raw material for a secondary industry (saw-milling) without being "marketed." For this reason all forest products were valued prior to the year 1933–34 at place of production before any marketing costs were incurred. Commencing with 1933–34, however, marketing costs, together with cost of goods consumed in process of production, have been taken into account where actually incurred. In any case, the statement of net values is not affected and is comparable throughout.

(*b*) As a proportion of *all* production, *recorded* production varies somewhat from year to year. On the average, total net recorded production represents slightly more than half of the net value of all goods and services produced in Western Australia.

Industrial Establishments

(Exclusive of Mines.)

PERTH :

BY AUTHORITY: WILLIAM H. WYATT, GOVERNMENT PRINTER

1948.

13197/12/47—

PART VI.—INDUSTRIAL ESTABLISHMENTS (Exclusive of Mines).

DEFINITION.—For the purpose of the Statistics that follow, an Industrial Establishment, is a "Factory," engaged in the manufacture, assembly, treatment, or repair of goods, in which four or more hands are employed, or power other than hand is used.

CONTENTS.

SPECIAL NOTES.—

(1) *Unless otherwise stated, figures for "Employment" include particulars of "Working Proprietors," and relate to the period of operation, which is not in all cases for the full twelve months. Contrawise, particulars for "Salaries and Wages" exclude the value of "Working Proprietors'" services.*

(2) *The Net Value of Manufacture, shown herein as "Value of Production" or "Net Production," is the value added in the course of manufacture. It is derived from Output by deducting the value of goods consumed (viz., materials used; fuel, power, and light; lubricating oil; repairs to plant; containers, packings, etc.) and represents the sum available for payment of wages, rent, interest, depreciation, certain unrecorded costs (such as advertising and insurance), and for the manufacturer's own income.*

(3) *Attention is drawn to the reclassification of Industry headings, particularly in Class IV.*

(*a*) It should be noted that there is a break in the continuity of the index-number series between June and July, 1935, owing to the inclusion, from July, 1935, onwards, of certain factories previously not included. This tends to exaggerate the degree of recovery.

Note.—The difference between total water drawn from all sources in any one year and the total distributed is due to pipe fractures and a large proportion of unmetered consumers. In addition 380 million gallons were pumped to Mundaring Reservoir in 1944–45, while extensive flushing of Reservoirs took place in 1947.

PART XII.—RETAIL PRICES, WAGES, EMPLOYMENT, AND MISCELLANEOUS.

I.—RETAIL PRICES

This section gives details of Retail Prices, Consumption of Foodstuffs, etc., and Retail Price Index Numbers.

RETAIL PRICES.

Retail Prices of selected groups of commodities and services are collected regularly by the Government Statistician from representative informants in the more important towns of Western Australia.

From 6 towns, prices are obtained for regimens covering (*a*) 41 items of Food and Groceries, (*b*) Rents of 4 and 5-roomed Houses, (*c*) 80 items of Adult and Juvenile Clothing, and (*d*) 27 items of Household Drapery and Utensils, and in addition, other items of Miscellaneous Expenditure, such as Fuel and Light. Prices of Food and Groceries only are collected from a more extensive list of towns. Informants are required to furnish prices monthly (prices as at the middle of the month) for Food and Groceries and quarterly (particulars as at the 15th of the middle month of each quarter) for House Rents, Clothing, and Miscellaneous items.

Specific grades and qualities have been established for the various items included in the regimen in order to ensure that all informants throughout the State shall quote consistently for articles of the same standard. The collection of data in the Metropolitan Area, Kalgoorlie-Boulder, Northam, Bunbury, and Geraldton—the "five towns" of Western Australia in the several Commonwealth retail price index series—is made under the authority of the Commonwealth Census and Statistics Act, 1905–1938. The State Statistical Department directly supervises the collection of data for the Commonwealth Statistician. The actual collection of returns is carried out by a specially qualified field officer of the Commonwealth Bureau of Census and Statistics, who is attached to the State Department. This officer checks prices and standards in the shops of informants, and inspects houses listed on the rent returns.

In those towns where returns are required under the State Statistics Act, 1907, the method of collection is substantially the same as that outlined above.

During the last few years, unusual difficulty has been experienced in obtaining prices for the compilation of several of the abovementioned series. This has been due to the scarcity and sporadic supply of certain types of goods as well as changes in the grade or quality of such goods on account of war-time conditions. Difficulties have been most pronounced in the case of the clothing section, and the household drapery and utensils section of the Miscellaneous series, necessitating in some cases the substitution of new grades, qualities or types of articles for those formerly included in the regimen, or again the adoption of various statistical devices to overcome the effects of the absence of quotations for goods temporarily off the market or in short supply.

Food and Groceries.

The regimen of Food and Groceries commodities adopted for the several index series issued by the Australian Statisticians is set out in Table No. 1. This shows the average prices quoted by retailers in the Metropolitan Area during each month of 1946.

CONSUMPTION OF FOODSTUFFS, ETC.

No. 2.—Consumption of Foodstuffs, Spirituous and Alcoholic Liquors, and Tobacco.

Details of the estimated annual consumption, per head of population, of some of the more important food commodities consumed in Western Australia (including quantities used in manufacturing) are shown in the table hereunder. Particulars are also given of the consumption of Spirituous and Alcoholic Liquors and Tobacco and Tobacco Preparations.

The figures have been derived from records of production and trade for the years 1938–39 to 1940–41, and show the average amounts consumed annually per head of population during that period.

RETAIL PRICE INDEX NUMBERS.

In this section are shown Index numbers computed from retail prices returns furnished by informants in the more important towns of the State.

These Index numbers cover selected "regimens" (or lists of commodities or services) comprising items of—

I.—Food and Groceries,

II.—Housing (Rents of 4 and 5-roomed Houses),

III.—Clothing, and

IV.—Miscellaneous Household Expenditure,

as well as combined regimens of Food, Groceries, and Housing (Groups I. and II.), and "All Items of Household Expenditure" (Groups I. to IV. inclusive)—the "B" and "C" ("All Items") Index Series respectively, of the Commonwealth Statistician.

The several Index series simply measure variations in the aggregate cost of a given regimen of commodities at various intervals of time or as between different towns, and are intended for use as approximate measures of general retail price movements in the commodity classes to which they refer. In this connection it cannot be too strongly emphasised that they do not, and are not, intended to measure an absolute "cost of living," *vide* Commonwealth Statistician's Labour Report No. 21, Appendix "Wages and Prices," page 167.

In the series set out in the following pages the Index numbers themselves represent the several "aggregates" expressed as relatives of the weighted average "aggregate cost" of the same regimen in the six capital cities over some specific interval of time, *e.g.*, the five years 1923 to 1927.

To ensure that the series shall be as reliable as possible, the commodities comprising the complete regimen have been selected to conform to the following conditions:—

1. They must be such that they can be clearly and definitely described.
2. They must be capable of standardisation, and mean the same thing at different times and places.
3. They must not be subject to violent or extreme seasonal fluctuations (hence, in general, fresh fruit and vegetables are excluded from the regimen).
4. They must be in common use, and their usage must comprise an appreciable proportion of the total consumption of the commodity group to which they relate, and moreover, remain relatively constant.
5. On the whole, they must be a fair sample of the commodity group which they purport to represent.

FOOD AND GROCERIES.

The following table sets out Index numbers representing variations in the prices of Food and Groceries in each of the five Western Australian towns covered by the Commonwealth Statistician's enquiries. The table also gives weighted averages for the "five towns," and the six capital cities of the Commonwealth. Weighting is on a population basis.

RETAIL PRICE INDEX NUMBERS—*continued.*

No. 9.—Clothing—Five Principal Towns.

Variations in the prices of the clothing regimen are given in the table hereunder. The regimen is based on the requirements of a nominal family unit of five persons, comprising a man, woman, boy (aged 10½ years), girl (aged 7 years), and boy (aged 3½ years). These persons are taken as representative respectively of men over seventeen years, women over seventeen years, children ten to sixteen years, children five to nine years, and children under five years.

Within each section, the items are weighted according to their relative consumption by the type of person concerned, and the sectional aggregates themselves are brought together in one composite aggregate after they have been weighted in accordance with an appropriate population factor. This factor represents the proportion which each age group bears to the total population.

No. 11.—"All Items" of Household Expenditure ("C" Series)—Five Principal Towns.

This table combines together in one series, the index numbers of Food and Groceries, Housing, Clothing and Miscellaneous Expenditure appearing in the preceding pages. This is the Commonwealth Statistician's "All Items" or "C" Series index of Retail Prices. The "C" Series index numbers were adopted by the Commonwealth Court of Arbitration as the basis for the adjustment of the wages declared in its judgment of the 17th April, 1934. Since its 1937 Basic Wage judgment, the Commonwealth tribunal has been using a special "Court Series" based on the "C" Series (see table No. 13, page 15).

No. 13.—The Commonwealth "Court" Series ("All Items").

This is the Index series issued by the Commonwealth Court of Conciliation and Arbitration, and used by it to vary the "needs" part of the Commonwealth Basic Wage. The series was first adopted by the Court in connection with its 1937 judgment, which provided that the "needs" portion of the basic wage should be the appropriate Index number stated as shillings (to the nearest whole number). It is obtained by multiplying the Commonwealth Statistician's "C" Series Index numbers by 0·081.

Five Principal Towns and Six Capital Cities—Each Series.

Tables Nos. 14 to 18 compare movements among the several Index series in each of the Commonwealth Statistician's "five Western Australian towns," while Tables Nos. 19 and 20 give similar details in respect of the weighted average of these towns and the six capital cities.

Note.—Each series has been given its own base. This is the weighted average cost of the particular regimen concerned, for the six capital cities, during the period 1923–27. The Index numbers cannot, of course, be compared with each other horizontally in order to show the relative costs of the different regimens, since the base of each series has been made equal to 1000.

II.—WAGES.

No. 21.—State Basic Wage.

Under the provisions of the Industrial Arbitration Act, 1912–25, authority was vested in the State Court of Arbitration to declare an annual Basic Wage operative as from the 1st of July each year.

The first decision of the Court took effect on the 1st July, 1926, and prescribed a rate of £4 5s. 0d. for males and £2 5s. 11d. for females throughout the whole of the State. In fixing the male rate the Court divided the wage into four elements, viz., Food and Groceries, Rent, Clothing and Miscellaneous Expenditure, and allowed amounts for each of these elements to meet the requirements of a family unit of four, comprising a man, his wife and two children. For Food and Groceries the amount was equivalent to the Piddington Commission's standard for this section (reduced to provide for a family unit of four) ; for Rent, the average rental of four and five-roomed houses ; for Clothing, an amount approximating the sum fixed for such expenditure by the New South Wales Board of Trade in 1925, and for Miscellaneous an amount based on the Piddington Commission's finding.

These rates remained unaltered until the 1st July, 1929, when the amounts were increased to £4 7s. 0d. and £2 7s. 0d. respectively, with the exception of certain specified goldfields areas, in respect of which the previous wage was retained.

A revision by the Court following the 1930 inquiry resulted in the declaration of a separate wage of £4 6s. 0d. for males and £2 6s. 5d. for females, in respect of the Metropolitan Area, and rates of £4 5s. 0d. and £2 5s. 11d. respectively for all other parts of the State.

Additional power was given the Court under the provisions of the Industrial Arbitration Act Amendment Act, 1930, to enable quarterly adjustments to be made to the annual declaration, and on the 3rd March, 1931, rates of £3 18s. 0d. for males and £2 2s. 2d. for females were prescribed for the Metropolitan Area, while all other parts of the State were fixed at £3 17s. 0d. and £2 1s. 8d. respectively.

The annual declaration operative as from the 1st July, 1931, did not vary these amounts, but a further quarterly adjustment on the 18th August, 1931, marked the inauguration of a different wage for agricultural areas, which are taken to be those areas comprised within the official South-West Land Division as gazetted under the Land Act.

Wage levels in all divisions of the State were considerably increased as from the 1st July, 1938, following the most comprehensive inquiry since the original declaration. In the course of the 1938 inquiry, special consideration was given to the factors of National Income and Standard of Nutrition. In the case of the Rent and Miscellaneous elements of the wage the "old" standards remained unchanged. For Clothing, however, the Court adopted the Piddington "standard"—reduced to provide for a family unit of four—and for Food and Groceries, the Piddington standard plus an amount of 1s.

At a sitting of the Court held on 26th February, 1942, to consider the quarterly adjustment of the basic wage, the Court decided that, in the light of existing economic conditions, there should be no alteration to the rates then in force. This decision marked the first occasion upon which the Court, in the exercise of the discretionary powers conferred upon it under the Act, had refrained from making a quarterly adjustment to the wage to equate its purchasing power to the "standards" of the relevant annual declaration. It was followed by a similar decision given on 29th April, 1942, when the Court reaffirmed that no adjustment would be made to existing rates, despite further increases in retail prices.

On 11th June, 1942, the Court in its annual declaration adopted the rates which had operated since 28th July, 1941, as its new base, and these remained in force until 8th August, 1942, when they were superseded by a Basic Wage Adjustment Order made by the Premier on 7th August under the authority of National Security (Economic Organisation) Regulations. The rates established under this Order were substantially the current equivalents of the standards adopted by the Court in its annual declarations, 1938-1941. These standards were re-adopted by the Court for the purposes of the quarterly adjustment of the basic wage made on 30th October, 1942, and for subsequent declarations.

The table hereunder shows annual declarations and certain interim variations since the original decision of 1926, which remained unaltered until 1st July, 1929.

No. 22.—Commonwealth Basic Wage.

While the Commonwealth Conciliation and Arbitration Act, 1904–30, empowers the Court constituted under that authority to prescribe "a minimum rate of wage" it neither defines nor provides for the determination of a specific "basic wage." The latter, however, is identifiable with the minimum wage payable to an adult unskilled labourer.

The history of the Commonwealth basic wage may be conveniently divided into two periods:

(1) Until 1934, rates were based on the "Harvester" judgment delivered by Mr. Justice Higgins in 1907, which fixed 42/- per week for Melbourne as a reasonable amount to meet the needs of "a family of about five."

From 1913 up to the end of 1921 the basic wage was simply a "Harvester" equivalent, rates being fixed by varying the original Harvester wage in accordance with movements in the purchasing power of money as disclosed by the Commonwealth Statistician's "A" Series Index Numbers covering items of food and groceries and rents of "all houses." Up to 1918 the Court in computing "Harvester" equivalents used the index numbers for the previous calendar year, from 1918 to the end of 1921, the figures for the next preceding four quarters were used, and from 1921 onwards the index numbers for the latest quarter available. In that same year the Court began to insert provisions in awards for the automatic adjustment of wages to quarterly movements in the "A" Series index, and a loading—subsequently known as the "Powers 3/-"—was added to the "Harvester equivalent" by Mr. Justice Powers to ensure that over a period of rapidly rising prices the worker would suffer no loss of real wages in the interval between the adjustment of rates.

The method of fixation and adjustment remained unaltered until after the onset of the depression. Then in 1931, the Court having satisfied itself that economic conditions were such as to preclude the maintenance of the prevailing level of real wages, directed that, with certain exceptions, all wages under its jurisdiction should be reduced by 10 per cent. as from 1st February of that year.

In its judgment of May, 1933, the Court concluded that the method of adjusting wages to conform to variations in the "A" Series index numbers had resulted in a decrease of real wages beyond the prescribed percentage. To correct this movement it adopted the use of the "D" Series index.

(2) In judgment delivered in April, 1934, the Court introduced an entirely new basis for the fixation of the basic wage. The "Harvester" standard supplemented by the Powers loading was discarded and a "fresh starting point" selected, which provided that an index number of 1000 in the Commonwealth Statistician's "All Items" (C) Series was to be equivalent to a

wage of 81/- per week. This new standard was based on that established by the New South Wales Board of Trade in 1925. Owing to adverse industrial conditions in South Australia and Tasmania the new rates for Hobart and Adelaide were graduated so as not to come into full operation until 1st June, 1935. The date on which future periodical adjustments were to become operative was altered to the first pay period in the months of June, September, December and March. Adjustments were continued on this basis until 1940, since when they have taken effect from the beginning of the second month after the end of each quarter.

The hearing of a claim by the combined unions for an increase in the basic wage was concluded in June, 1937, when the Court in fixing a new rate transferred the basis of the adjustment of wages from the "C" Series to a special "Court" Series (see page 15), and at the same time provided for the addition of various differential prosperity loadings to the rate payable under the shillings table as determined by the 1934 judgment. By this method (which is still retained following upon a further judgment delivered by the Court on 7th February, 1941), the first or "needs" part of the basic wage is varied in accordance with movements in the "Court" prices index, but the loadings (which came into operation by instalments) are fixed amounts. For the six capital cities the prosperity loadings are as follows: Sydney 6/-, Melbourne 6/-, Brisbane 6/-, Perth 4/-, Adelaide 4/-, Hobart 4/-, Six Capitals 5/-.

Commonwealth Basic Wage rates payable in each of the Six Capital Cities since 1934 are set out hereunder:—

EMPLOYMENT—*continued.*

No. 25.—Employment according to Pay Roll Tax Returns.

(Information supplied by courtesy of Commonwealth Statistician).

This table shows the number of persons on the last pay roll of the month of those employers who are subject to Pay Roll tax. It does not cover the whole field of employment since it excludes (a) Establishments where the pay roll is not more than £20 per week, (b) Commonwealth Departments, (c) certain other classes of establishments such as Religious or Public Benefit institutions, and Public Hospitals. Where the employer is engaged in more than one industry, the employees are classified under the industry in which such employer is predominantly engaged.

Employees of State, Semi-Government, and Local Government authorities are included under the appropriate industry heading *only* when separate returns are supplied, *e.g.*, certain State Government Trading Concerns and Public Utilities. The figures shown in this table may be taken as indicative of trend of employment, but not as a guide to absolute numbers employed in the respective industries.

No. 27.—Index of Employment in Factories.

The annual mean employment in factories for the year 1928–29 (19,799) has been taken as base, = 100, in the index series shown below. Figures have been computed from particulars obtained in respect of the whole field of factory employment. It should be noted that there is a break in the continuity of the series between June and July, 1935, owing to the inclusion from the latter month onwards of certain factories previously not included. To this extent the index numbers to June, 1935, are not strictly comparable with those following.

STATISTICAL VIEW of the PROGRESS of WESTERN AUSTRALIA 1829 to 1945-46.

Note.—Prior to the year 1837 no Blue Books were issued, and figures relative to arrivals and departures, shipping, imports and exports have been taken either from the reports of the Harbour Master at Fremantle or from Perth newspapers of the period. From 1838 to 1859, inclusive, migration figures show only the excess of arrivals over departures or *vice versa*.
